

FlyRank Capstone â General AI Fluency (Week 6 & Week 8)

****Candidate:**** Eric Munyi ('munyieric7@gmail.com')

****Track:**** General AI Fluency (FL)

****Deliverable Type:**** Impact Project / Send the Link (Portfolio Longevity & Cadence Plan)

****Project:**** EcoHive Kenya Ltd. â Climate-Smart Honey Value Chain

****Live Production App:**** https://ecohive-jet.vercel.app/

****LinkedIn:**** https://www.linkedin.com/in/munyi-eric/

1. Where the Next Case Study Will Go & The Steps to Add One

Location

The next case study will live directly within the portfolio as a dedicated tab/view alongside EcoHive Kenya, indexed under '/case'

The Three-Beat Execution Framework (Week 2 Shape)

Every new piece of work added to this platform follows the verified 3-beat rhythm:

1. ****Beat 1: The Problem (Context, Friction & Human Reality)****

- ***What was broken or missing before?***

- ***Focus:*** Identify the raw human, operational, or ecological constraint before technology was introduced (e.g., smallholder be

2. ****Beat 2: What I Did (Architecture, Constraints & Deliberate Trade-offs)****

- ***What technical choices were made, and why?***

- ***Focus:*** Document engineering decisions, trade-offs, and tool selection with transparency. Explain why one path was chose

3. ****Beat 3: What Came of It (Measurable Impact, Data & Honest Reflection)****

- ***What was the real outcome?***

- ***Focus:*** Deliver quantifiable numbers, operational gains, and what was learned (e.g., telemetry latency dropped under 2 sec

2. The Named Next Real Piece of Work

*** **Project Title:** *EcoHive LoRaWAN Hardware Gateway & USSD Farmer Alert Engine****

*** **Executive Summary:** *Designing the physical IoT receiver layer that bridges field sensor telemetry from solar-powered beeh**

*** **Technical Scope:****

- Microcontroller firmware (ESP32 + SX1276 LoRa transceiver).

- Africa's Talking SMS API webhook handler in Node.js/Express.

- Multi-lingual SMS parsing (English and Swahili prompt sets).

3. Concrete Evidence of the Reminder Set

To prevent the portfolio from becoming a static class artifact, a recurring calendar cadence has been established:

*** **Trigger:** *Google Calendar Recurring Monthly Milestone**

*** **Schedule:** *First Saturday of Every Month at 10:00 AM EAT** (Starting October 2026)**

*** **Calendar Event Title:** *'[FlyRank Portfolio Cadence] Review EcoHive Hardware Milestone & Draft 3-Beat Case Study'**
